

Delta 21 vertical

The interactive play system Delta 21 vertical has a 21 inch touch screen. The games are suitable for children from 8 to 12+ years old. The educational and non-violent games are specially designed by the IKC studio. These games stimulate children to improve their creativeness and their ability to react in a playful way!

The housing is the same size as our standard play modules, making sure the play system can be used as a stand-alone play solution for on the wall, but also as an option for our play systems and fences. The modern, safe and durable housing allows children to play and explore freely.

See all information about the games on the next pages!
